

## Special Issue

**BISMUTH NANOPARTICLES AS ANTIMICROBIAL AGENTS OF  
BROAD-SPECTRUM, SAFETY AND LOW COST****Claudio Cabral-Romero<sup>1</sup>****AIM AND SCOPE**

The aim of this hot topic is to highlight and development leading to potential clinical applications in the prevention and treatment of infectious diseases. It is urgent to looking for new and safety drugs to fight against multiresistant pathogens.

**Keywords:** *Bismuth nanoparticles, antimicrobial agents, bactericidal activity, fungicidal property, antiviral activity*

**SUBTOPICS**

<b>1</b>	<b>Synthesis and characterization of bismuth nanoparticles</b>
<b>2</b>	<b>Biomedical applications for bismuth nanoparticles</b>
<b>3</b>	<b>Antibiofilm properties of bismuth nanoparticles</b>

**SCHEDULE**

Manuscript submission deadline	<b>12/15/2014</b>
Peer Review Due	<b>2-4 weeks</b>
Revision Due	<b>1-2 weeks</b>
Notification of acceptance by the Guest Editor	<b>1-5 days</b>
Final manuscripts due	<b>1-2 weeks</b>
