Dear Readers, Authors, Reviewers, and Editorial Board Members,

Thank you very much for your continuing support. 2021 was an excellent year for our journal, and there were published 120 research and review papers, meaning 1226 pages divided into 4 issues.

Due to the extraordinary efforts of all of you, the entire Volume 10, 2021, was published in advance, and in the mid of 2021, we were able to start Volume 11, 2022. We managed to maintain the publication standards and the number of published articles per issue.

It is a great pleasure to announce that we will continue the publication under the platinum open-access policy (100% free for authors, 100% free for readers).

In light of the above mentioned, the aim for 2022 is to increase the publication standards more and more to obtain the indexation in the leading international databases.

**Keywords:** nanoscience; bioscience; nanobioscience; platinum-open access.
