Dear Readers, Authors, Reviewers, and Editorial Board Members,

Gratitude to all of you involved in the development of Letters in Applied NanoBioScience. Volume 11 of 2022 was a great success, consisting of 120 articles and reviews in 1337 pages, published in advance. In January 2022, editorial staff started Volume 12, assigned to 2023.

Starting with this volume, article numbers instead of the traditional method of continuous pagination will be used. This approach allows a faster production process.

Even if the financial efforts for publications increased in the last few years, the platinum open-access policy is still supported by the journal staff.

Letters in Applied NanoBioscience is pleased to invite contributors to submit their recent results and ideas for publication.

Keywords: nanoscience; bioscience; nanobioscience; platinum open-access.
